Questions for the Eye Doctor

What is my child's diagnosis?

Is it stable? Will it get better? Will it get worse?

Is there any treatment for the condition?

Is there anything that I can do to protect or prolong my child's vision?

Will eyeglasses or contact lenses help?

Will low vision aids help?

Can you tell me how much my child can see?

What kind of lighting is best for my child?

What is my child's best viewing distance?

How does this eye condition affect my child's mobility?

Does my child need special accommodations like enlarged print size or seating in the front of the class?

How often should I have my child's vision checked?
